

UKRAINE

The result of qualifications is calculated on the basis of:

■ **certificate of secondary comprehensive education** (атестат про повну загальну середню освіту) – **as basic level**

or

■ **exam – Multitest (NMT)** – **as extended level**

Results will be calculated as follows:

Certificate of secondary comprehensive education – treated as basic level – maximum grade "12"	Exam NMT – treated as extended level – maximum grade "100-200"
The conversion factor 0.6. <ul style="list-style-type: none">• grade 12 = 100 p.• grade 11 = 92 p.• grade 10 = 83 p.• grade 9 = 75 p.• grade 8 = 67 p.• grade 7 = 58 p.• grade 6 = 50 p.• grade 5 = 42 p.• grade 4 = 33 p. <p>The obtained points are multiplied by factor 0,6, for example:</p> <p>100 x 0,6 = 60</p>	The conversion factor Result of subject ZNO – 100 = points considered in the admissions process e.g. 179 - 100 = 79

When a foreign language or a required subject are included both in a secondary comprehensive education certificate and NMT examination, this option is considered which, when calculated, leads to a higher grade.

We invite you to contact our **Unit for Teaching Administration** for proper calculation of points.
